

AASTU Cafeteria System Survey Questions

Survey Objectives

This survey validates stakeholder requirements for the AASTU Cafeteria Meal Tracking System, specifically addressing:

- Student ID-based meal access verification and transaction recording
 - Prevention of duplicate meal access per session per day
 - Meal session management (Breakfast, Lunch, Dinner)
 - Transaction timestamping and reporting capabilities
-

SECTION A: Respondent Profile & System Context

Q1. What is your role at AASTU?

- ☐ Student
- ☐ Cafeteria Staff/Operator
- ☐ Cafeteria Manager/Supervisor
- ☐ Administrative Staff
- ☐ Other: ____

Q2. How frequently do you interact with the cafeteria meal access system?

- ☐ Daily (multiple times)
 - ☐ Daily (once)
 - ☐ 3-5 times per week
 - ☐ 1-2 times per week
 - ☐ Rarely/Not applicable
-

SECTION B: Student Identity Verification & Access Control

Q3. How critical is it that the system verifies student identity before granting meal access?

- ☐ Critical (must-have)
- ☐ Very important
- ☐ Important
- ☐ Somewhat important
- ☐ Not important

Q4. Current student ID verification process reliability:

- ☐ Highly reliable (rarely fails)
- ☐ Mostly reliable (occasional issues)
- ☐ Average (frequent issues)
- ☐ Unreliable (many failures)
- ☐ Unsure

Q5. Should the system allow access based on:

- ☐ Student ID card scan only
 - ☐ Student ID + verbal confirmation
 - ☐ Manual entry with verification
 - ☐ Multiple verification methods
 - ☐ Unsure
-

SECTION C: Transaction Recording & Timestamping

Q6. Is it important to record the exact timestamp (date and time) of each meal access?

- ☐ Critical for operations
- ☐ Very important
- ☐ Important
- ☐ Nice to have
- ☐ Not necessary

Q7. What information should be recorded for each meal transaction? (Select all that apply)

- ☐ Student identity (ID/Name)
- ☐ Date of access
- ☐ Time of access (exact timestamp)
- ☐ Meal session attended (Breakfast/Lunch/Dinner)
- ☐ Transaction status (Success or Duplicate Attempt)
- ☐ All of the above

Q8. How quickly should transaction records be available to staff after a scan?

- ☐ Instantly (real-time)
- ☐ Within 1 second
- ☐ Within 5 seconds
- ☐ Within 1 minute
- ☐ End of day summary is sufficient

SECTION D: Duplicate Meal Access Prevention

Q9. How important is preventing duplicate meal access per session per day?

- ☐ Critical (system must enforce this)
- ☐ Very important
- ☐ Important
- ☐ Somewhat important
- ☐ Not important

Q10. Current duplicate meal access incidents:

- ☐ Happen very frequently
- ☐ Happen regularly
- ☐ Happen occasionally
- ☐ Rarely happen
- ☐ Do not happen/Not aware of them

Q11. How should the system handle a duplicate meal attempt for the same student in the same meal session on the same day?

- ☐ Reject access immediately (block the scan)
- ☐ Allow access but flag it as "Duplicate Attempt"
- ☐ Alert staff to manually verify
- ☐ Log for review without blocking access
- ☐ Unsure

Q12. Should administrative staff be able to override the duplicate meal restriction in special cases?

- ☐ Never (always enforce the rule)
- ☐ Only with supervisor approval and logging
- ☐ Yes, anytime
- ☐ Rarely/case-by-case
- ☐ Unsure

Q13. What should the transaction status field record?

- ☐ Only "Success" for valid access
- ☐ "Success" for valid access, "Duplicate Attempt" for repeated scans
- ☐ Additional statuses for different scenarios
- ☐ Other: ____

SECTION E: Meal Sessions Structure

Q14. Should the system support these meal sessions? (Select all that apply)

- ☐ Breakfast (morning meal)
- ☐ Lunch (midday meal)
- ☐ Dinner (evening meal)
- ☐ All three sessions

Q15. Should each meal session have defined operating hours?

- ☐ Yes, with start and end times
- ☐ Yes, but flexible
- ☐ Not necessary
- ☐ Unsure

Q16. Can a student access multiple different meal sessions in a single day?

- ☐ Yes, one meal per session maximum
- ☐ Yes, with no restrictions
- ☐ No, one meal per day only
- ☐ Unsure

SECTION F: Menu Management & Information

Q17. Should the system store and maintain daily meal menus?

- ☐ Yes, essential for operations
- ☐ Yes, but optional
- ☐ No, not necessary
- ☐ Unsure

Q18. Menu information should include:

- ☐ Date of the menu
- ☐ Meal session (Breakfast/Lunch/Dinner)
- ☐ List of food items
- ☐ All of the above

SECTION G: Reporting & Analytics

Q19. How important is the ability to generate reports on:

Report Type	Critical	Important	Nice-to-have	Not needed
Daily meal consumption count	☐	☐	☐	☐
Peak hours (when most students access meals)	☐	☐	☐	☐
High-traffic days	☐	☐	☐	☐
Transaction status summary (Success vs Duplicate)	☐	☐	☐	☐
Student meal access history	☐	☐	☐	☐

Q20. How frequently should usage reports be generated?

- ☐ Real-time/continuously
- ☐ Hourly
- ☐ Daily
- ☐ Weekly
- ☐ Monthly
- ☐ On-demand only

Q21. Who needs access to transaction reports?

- ☐ Cafeteria manager/administrator only
- ☐ Cafeteria staff
- ☐ University administration
- ☐ Students (their own data only)
- ☐ Multiple roles with different access levels

SECTION H: System Performance & Reliability

Q22. How many students should the system support during peak meal times?

- ☐ Up to 100 students/hour
- ☐ Up to 500 students/hour
- ☐ Up to 1,000 students/hour
- ☐ More than 1,000 students/hour
- ☐ Unsure

Q23. What is the acceptable response time for a student ID scan?

- ☐ Less than 1 second
- ☐ 1-2 seconds
- ☐ 2-5 seconds
- ☐ Up to 10 seconds
- ☐ Unsure

Q24. How many concurrent meal access points (scanners) should the system support?

- ☐ 1 scanner
- ☐ 2-3 scanners
- ☐ 4-5 scanners
- ☐ More than 5 scanners
- ☐ Unsure

SECTION I: Core Business Logic Validation

Q25. A student should be able to:

- ☐ Access only ONE meal per session per day
- ☐ Access multiple meals per session per day
- ☐ Access unlimited meals
- ☐ Unsure

Q26. The system must prevent:

- ☐ The same student accessing the same meal session twice in one day
- ☐ The same student accessing any meal session twice in one day
- ☐ All duplicate transactions
- ☐ Unsure

Q27. Transaction data must include:

- ☐ Student information
- ☐ Session type (Breakfast/Lunch/Dinner)
- ☐ Date and exact timestamp
- ☐ Success/Duplicate status
- ☐ All of the above

SECTION J: Implementation Feedback

Q28. Are there any specific business rules or constraints not mentioned above that the meal access system must enforce?

Q29. What is the most critical feature for this database system from your perspective?

- ☐ Accurate transaction recording with timestamps
- ☐ Duplicate meal prevention
- ☐ Reporting and analytics
- ☐ Menu information management
- ☐ System reliability and performance
- ☐ Other: ____

Q30. Any additional comments or requirements for the cafeteria system?

Survey Instructions

For Respondents:

- Focus on the actual needs of the transaction-based meal access system
- Answer based on your real experience with cafeteria operations
- This survey should take approximately 5-10 minutes

- Thank you for your input

For System Designers:

- Use responses to validate schema design (student, meal_session, menu, meal_transaction tables)
 - Confirm duplicate prevention business rules
 - Prioritize reporting needs
 - Validate performance requirements
-

Survey Version: 2.0 (Implementation-Focused)

Date Created: May 2026

Organization: Addis Ababa Science and Technology University (AASTU)

System Name: AASTU Cafeteria Meal Tracking System

Scope: Validates transaction recording, duplicate prevention, meal sessions, and reporting requirements directly aligned to implemented database schema
